

# Clear Textures

Most of the clear textured glass does not come in different colors. Granite, Hammered, Glue Chip come in multiple colors. Others have only a select few colors they come in which is noted below the texture. Water glass and Artique have not been pictured and come in various colors. Water glass looks like water and artique has slight lines that give a bit of a distortion but both are quite clear.

*Baroque glass comes in many colors usually mixed with clear and sometimes white.*
